

Night Shift – Production Supervisor

Our client has seen tremendous growth over the last few years which has driven substantial investment in their plants. They are now looking to add a night shift to their high volume make to order / make to stock food grade manufacturing plant located in Acheson, Alberta. As such they require a Night Shift Production Supervisor to oversee a team of approximately 10 to 15 hourly production team members, coordinate work assignments, and have general oversight of a specific area of operations.

In this role you will:

- Ensure nightly production targets are met and lead your team to meet company goals and KPI's
- Maintain accurate reporting and communications with Production Manager and or Plant Manager.
- Poses excellent people leadership, communication and time management skills and have the ability to maintain workflow while multitasking.
- Ensure compliance with all provincial and federal legislation including HACCP, WCB, WHMIS and all corporate company policies.
- Ensure a safe and healthy environment for all team members
- Lead your team to produce products that meet or exceed quality standards
- Collaborate with other department leaders including maintenance, quality, warehouse.

QUALIFICATIONS:

- 3+ years of supervisory level experience, preferably from a food manufacturing environment
- the desire to lead and strengthen a knowledgeable work force
- the ability to prepare and present recommendations to coworkers and decision makers
- strong organizational and analytical skills
- The suitable candidate must be organized with excellent communication skills both written and verbal.
- Proven experience to make decisions and operate both in a team setting and independently
