

Plant Production Manager

Our client is looking for a **Plant Production Manager** with strong previous people leadership experience from a food, beverage or agricultural manufacturing facility in the Edmonton Alberta area. In this role, you will oversee supervisors responsible for multiple lines in a batch manufacturing environment.

Our Client is looking for a true people leader that brings substantial experience from a fast paced, high volume manufacturing plant. Your previous experience leading teams on varying shifts through the week, collaborating with managers from other areas including quality, maintenance and warehousing will help you to be successful.

Specific responsibilities in this role will include:

- Ensure that production targets are met in a multi-shift, 24-5 operation
- Respecting the quality criteria and procedures in place
- Respecting standards of efficiency and productivity
- Ensure production objectives are achieved
- Maintain a safe and environmentally friendly operation
- Work closely with supervisors to coach and mentor your team for growth.

IDEAL CANDIDATE: This is a demanding position for a production professional with substantial experience in batch or line manufacturing.

In order to qualify for this role, you must have at minimum:

- 5 years minimum of production management or senior supervisor experience
- Advanced communication skills both written and verbal
- Capability to work in a collaborative team environment
- Advanced computer skills (Microsoft Word, Outlook, and the Internet)
- *Formal education in Operations Management, Engineering or Business would be a benefit.*
- *Experience with LEAN or other CI activities also a benefit*

To apply for this position, please submit your resume in word or PDF format to Sean Baker at sean@macdonaldsearchgroup.com and ensure your subject line reads: **Plant Production Manager**
