

Senior Supply Chain Analyst

\$80 – 100k

Our client located in near the Mississauga / Oakville border is looking for a Senior Supply Chain Analyst Experience in Pharma industry experience is likely required. May consider a candidate with a food background, but only if very strong.

You MUST BE an Excel SUPERUSER, or this job will not work for the client or you. Currently using Dynamics NAV as their ERP. The planning is done in Excel with data pulled directly from NAV (which is why we need strong Excel).

You should have experience in Procurement + Planning. You will be involved in cutting the PO and bringing in the product; determining when and how much product to procure

Working with CMOs (Contract Manufacturing Organizations) is very important – and you need to be comfortable with having difficult conversations and driving these conversations.

You should have Excellent Analytical expertise;

- prepare S&OP on a monthly basis
- determines KPIs
- runs reports
- good with numbers

University Education in Business or Logistics is preferred. C.S.C.M.P. or other Supply Chain designations are considered an asset.

For the person that meets these very specific requirements it will be a great job with a really talented team to become a part of. But it is REALLY Fast PACED, and DEMANDING .. some people thrive on that.

If you have all these qualifications, please send your RESUME / application to Steven Bryce and we can start the process.

Steven Bryce, C.P.A., C.A., M.B.A
