

Senior Project Manager - PRO03660-21

Description

Be a part of a transformational journey with innovative talent and leading edge technologies.

Join our team

Are you a strategic thinker? Do you have a track record of ideas, influence and impact? There's a buzz around Procurement within TELUS. Why? We're on a transformational journey towards being the best Procurement & Supply Chain organization in the world and increasingly recognized as a key enable to driving TELUS' competitive advantage. It's a ground-breaking ride with many complex challenges, opportunities to explore, and value we can add. We are redefining the Procurement & Supply Chain brand and advancing the service delivery model to make an even larger contribution to corporate priorities ultimately creating exceptional experiences for customers across Canada.

Here's the impact you'll make and what we'll accomplish together

As a Senior Project Manager within the Chief Procurement Office Transformation team, you will help build and define the strategy to transform and digitize Procurement & Supply Chain operations. The Procurement & Supply Chain team impacts everything and everyone. We're the trusted business partner to senior leaders accountable for making informed decisions on strategic and operational expenditures. Knowing every team member buys something, we continuously strive to make the buying experience simple, easy and efficient. Our partnership model approach extends to suppliers who become strategic partners in our quest to deliver the best value, minimize risks, introduce innovation, and achieve the best results. Layering in technology advancements such as artificial intelligence and robotic process automation into our practice is world-class and opens our minds to the extent of new possibilities.

Here's how

- Lead transformative projects to optimize the source-to-pay and customer fulfillment process
- Prepare executive-level summary reports and presentations
- Collaborate with and influence stakeholders across the entire TELUS organization
- Drive best-in-class project management techniques, navigating risk, complexity and communicating business impact

- Ability to maneuver through governance processes

Qualifications

You're the missing piece of the puzzle

- Advanced knowledge of project management methodologies, principles and practices
- Understanding of customer journey mapping and penchant for delivering solutions that maximize the user experience
- Recognized for driving change and innovation
- Regarded as an exceptional communicator and influencer; able to build and maintain effective partnerships internally and externally with all stakeholders, including senior leaders
- Strong presentation and facilitation skills
- Excellent interpersonal skills and capacity for teamwork
- Organizational and time management skills
- 3 to 5 years of relevant work experience, preferably in the telecommunications industry
- With a Bachelor's degree in any domain

Great-to-haves

- Understanding of procurement, supply chain operations and/or source-to-pay processes
- Technical understanding of systems implementation and integration
- PMP certification, Lean Six Sigma Black Belt, or other project management designations
