Position and Responsibilities

Reporting to the manager, maintenance, the materials management coordinator will be committed to helping Key Lake and McArthur River achieve reliability excellence. You will be responsible for developing and implementing the materials management strategy including job kitting, point-of-use, free issue, storage optimization and material delivery. You will lead the materials management teams to ensure they deliver appropriate service levels to the sites safely and effectively, including general site shipping/receiving as well as maintenance and production support. You will ensure the warehouse goals and KPIs are met, along with compliance to all regulations including CNSC, SMOE and Transport Canada. You will provide coaching, guidance and direction to the team members and lead continuous improvement activities.

Education and Qualifications

Requirements of the position:

- Bachelor's degree in a related field OR
- A valid Saskatchewan or interprovincial journeyman ticket
- Minimum of eight years of experience in an industrial setting
- Equivalent combination of education and work experience considered
- Previous supervisory and inventory management experience
- Experience with a computer maintenance management system such as SAP
- Work a rotational schedule and commute to site by aircraft

Assets:

- Transportation of Dangerous Goods Certificate
- Experience in an inventory optimization project
- Experience in establishing a free-issue and point-of-use materials program

Preference will be given to qualified internal candidates and Residents of Saskatchewan's North.

Safety is a top priority at Cameco. Successful candidates for all positions at safety-sensitive sites or in safety-sensitive positions must take and pass a substance test (which includes marijuana testing) as a condition of employment. Marijuana remains in a user's system for about 30 days, so applicants who recently used marijuana recreationally should not expect to pass a substance test.
